Hazael Pérez

AI Solution Architecture

Associate Director, Customer Technology Advisor - Cloud | Kyndryl | May 2026 - Present
Monterrey, Nuevo León, Mexico · me@hazaelperez.com · LinkedIn

I specialize in AI solution design on Microsoft Azure and work with AWS and Google Cloud. I started in software development and moved into architecture, technical sales and AI transformation.

Highlights

USD 90M
Total contract value for a closed deal with a global bottler.

USD 9M
Total contract value for a closed deal with an airline.

50+
Internal AI projects in the portfolio I built at Onesec.

8+ years in software and cloud, with 50+ demos and proofs of concept designed and delivered across cloud and AI.

Professional experience

Kyndryl | Associate Director · Customer Technology Advisor - Cloud
May 2026 - Present

Customer-facing solution design for enterprise sales at Kyndryl Mexico.

- Lead technical discovery and turn client requirements into cloud and modernization architectures, project scope and cost estimates.
- Compare design options and explain trade-offs in cost, security and operations to clients and sales teams.
- Build proofs of concept to validate designs and provide architecture expertise to delivery teams.

Dotech | Lead Cloud Solutions Architect
Aug 2025 - Apr 2026

Designed and documented cloud architectures, evaluated emerging technologies and worked with engineering teams on solution design.

Onesec | AI Transformation Unit Manager
Mar 2025 - Jul 2025

Led the AI Transformation Unit and built a portfolio of 50+ internal AI projects. Scoped use cases across Microsoft Copilot, Azure AI Foundry, Azure OpenAI and Google Cloud.

iNBest | R&D and CX Director / Head of Presales
Sep 2024 - Mar 2025

- Designed retrieval-augmented generation (RAG) solutions using vector search and vector databases.
- Worked on real-time audio applications powered by large language models (LLMs).
- Led R&D and technical presales, developed reference architectures and advised clients on Azure and AWS.

Professional experience, continued

Big Wave Data

As an entrepreneur and equity partner, I helped grow Big Wave Data from a startup into the #1 partner of our distributor CompuSoluciones and one of Mexico's leading cloud partners in six years. I led technical strategy as the team grew from six to nearly 30 in three years, and supported due diligence and the sale after an investor approached us.

My AI work at Big Wave Data covered machine learning, data analysis, computer vision and advanced Modular Reasoning, Knowledge and Language (MRKL) systems.

Head of R&D
Big Wave Data - by iNBest · Software Development | 2022 - 2023

Led development teams, evaluated new technologies, reviewed application architecture and database design, and ran technical presales.

Fullstack Cloud Developer
Big Wave Data · Equity Partner | 2020 - 2022

Led technical teams across IoT and software development, designed cloud solutions and supported presales for selected clients.

Cloud Developer
Big Wave Data | 2018 - 2020

Built Azure applications with .NET and SQL Server, optimized database routines and developed mobile geolocation features.

Technical skills

AI & data · Generative AI, LLMs, RAG, Vector search & databases, Real-time audio, MRKL systems, Machine learning, Computer vision, Data analysis, Microsoft Fabric, Databricks
Cloud platforms · Microsoft Azure (primary), Azure OpenAI, Azure AI Foundry, Microsoft Copilot, AWS, Google Cloud (GCP)
Software engineering · Python, SQL, SQL Server, .NET, API design, Docker, Kubernetes
Solution design & presales · Requirements analysis, Reference architectures, Application modernization, Cost estimation, Proofs of concept, RFPs & proposals

Credentials & education

Modernization Solution Architect Foundation
Kyndryl · Application modernization using the Kyndryl Agentic AI Framework.

Microsoft Certified: Azure Fundamentals

Copilot Studio Technical Bootcamp
Microsoft · FY25 participant

Scrum Fundamentals Certified (SFC)

Bachelor's degree in Computer Systems
TecNM · Tamazunchale Campus · 2013 - 2018

Languages
Spanish (native), English (professional proficiency)

Community
Microsoft Tech Days speaker · Hackathon mentor · Technical workshop facilitator
